01 PLYWOOD

Engineered flooring lets you bring the beauty and warmth of hardwood into all areas of your home. It looks like solid hardwood because it is! But underneath, it's "engineered" to allow the wood to naturally contract and expand. That means it can be installed virtually everywhere, even in high-moisture areas like basements and over concrete!

Simplex wood flooring -rigid core with wood veneer

This product has eight advantages over previous traditional engineered hardwood flooring.

To make up for the shortcomings of the past product.

As two-layer engineered hardwood flooring, it can avoid ADD and CVD for the USA market.

Advantages	Wood	Standard Engineered Wood
Real wood veneer with natural looking	√	√
Good foot sense	√	√
Can be wet mopped=easy-to-clean	√	×
Stable to high temperature and humidity variations	√	×
Suitable for Every Room	√	√
Impact Resistant & indentation	√	√
No acclimation required	√	×
Minimum Preparations	√	×

HERRINGBONE

Herringbone is a very popular pattern. It got its name from its resemblance to the pattern of bones of a herring, and is very similar to the chevron pattern.

More and more people are opting for engineered herringbone flooring, moving away from the traditional solid blocks.

This type of flooring is an excellent choice for those wanting to decorate their homes on a budget, but still achieve that luxurious finished effect. Engineered is typically more cost effective than solid blocks, and there's also labour to take into consideration too.

There's a wide variety of choices of colour from deep, rich, chocolatey colours to light oaks and even greys, there's an option to suit all styles of home, and all preferences.

05 CHEVRON

Chevron flooring pattern originated in 17th century France, where it quickly became one of the most preferred types of floors in the palaces of the kings and nobility alike. The main difference between chevron and herringbone patterns is that the chevron planks are cut to ensure that each “zig” and “zag” are connected at a 45 degree angle.

In recent times, these beautiful chevrons floors are being installed across the UK and many other parts of the world. If you ever read the latest fashions magazines, you would have noticed the chevron floorings feature in many fashion shoot.

With the veneer of European Oak or Walnut, it looks simple and noble.

It not only ensures the beauty, but also maintains the hardness and wear-resistance of these species themselves.

06

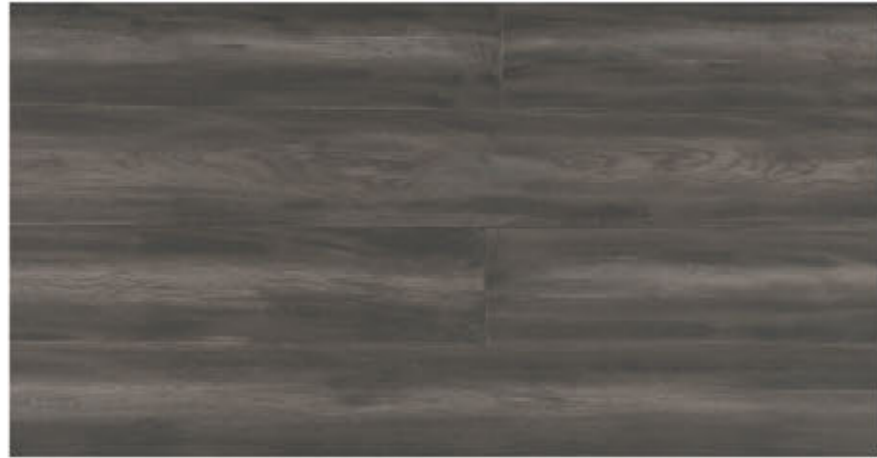

GLAZE FINISH

Waterborn Glaze cured finish is a newly launched technologies, which captures not only the organic, realistic look and feel, but the unparalleled colorfast function.

It permeates into the wood grain with carefully applied staining by hand, adjusting the different color tunes which make the flooring more vertical and realistic, especially for the hand craft surface treatment.

Waterborne Glaze cured finish function better in resistance of color to fading or running, resulting in the best durability and color protection.

Style, aesthetic, performance: Engineered hardwood flooring at its finest.
